John Darryl Pelingo

I like crafting software that solves my problems. I am interested in the web, mainly front-end software development. I also thrive on delivering quality and robust products that are well-tested and adapted for production. With my swift adaptation and Agile mentality, I see myself fit pleasantly in any team.

EXPERIENCE

Open Source Software, Github — *Contributor*

September 2017 - PRESENT

Contributed to minor documentation fixes of libraries and awesome lists. Open sourced multiple react web applications including react-window-assistant and react-twitch-streamers.

ABOUT YOU GmbH, Hamburg, Germany — *Frontend Developer*

September 2018 - PRESENT

Building frontend for flagship features of the web site, contributing to the company's revenue growth. Contributed in improving developer experience in addition to pushing best practices for testing.

Beat, Athens, Greece — *Frontend Developer*

April 2017 - September 2018

Established culture of frontend unit and integration testing as well as end-to-end testing. Wrote exhaustive documentation of current frontend projects and lead a huge refactor of a vital internal tool.

Beat, Athens, Greece — *Junior Frontend Developer*

September 2017 - March 2017

Maintained and added features into internal company dashboard. Created internal web applications for dynamic forms creation and map visualization.

OgilvyOne Worldwide Athens, Athens, Greece — *Junior Web Developer*

October 2016 - August 2017

Took ownership and produced landing pages for campaigns and advertisements. Assisted in developing and maintaining Drupal 7 websites with a multitude of content. Design and implement newsletter emails that supported every major email client including Microsoft outlook and its older versions. Assisted in developing mini-sites in PHP5 with responsive design and IE8 support.
